

# Roped Pair Aviation Wheel Chocks for Small Aircraft, Yellow - AC201

## Product Images

## Short Description

- For small aircraft
- Impact-absorbing, lightweight urethane
- Weather and abrasion resistant
- High load-bearing capacity
- Resistant to aircraft fuels, oils, and lubricants

- Eliminates Foreign Object Damage (FOD)
- Will not rot, crack or splinter like wood
- Sold roped together as pairs
- Molded-in high-visibility yellow color

## Description

AC200 aviation wheel chocks are designed for small aircraft and aviation equipment. They are manufactured with highly durable, lightweight polyurethane, which lasts longer than wooden chocks, never needs painting and eliminates Foreign Object Damage (FOD) threats for aircraft. AC200 wheel chocks fit the curvature of the tire to absorb wheel-squat during loading and fueling operations. They also feature molded-in soft base for increased traction. These chocks are sold in pairs with a 3/8 in. x 24 in. replaceable polyester rope lanyard connecting the two chocks together. Custom rope lengths are available.

## Specifications

|                   |                  |
|-------------------|------------------|
| Model No          | AC201            |
